

The background is a gradient of dark blue and purple, speckled with small white dots. On the left side, there are several concentric circles and a large circular scale with degree markings from 140 to 260. Some circles have arrows indicating a clockwise direction.

# PAYTRON

PITCH DECK

# TEAM

- Emmanuel Kwabena Mensah

# PROBLEM STATEMENT

- **Dependence on regular banking system**

Platforms been used by businesses worldwide for the management of salaries and wages are mostly if not all dependent on the regular banking system of the host country which has its fair share of issues

- **Payroll withholding**

Using the traditional means of payroll management it is very possible for a company to withhold the payment of a staff member with impunity and this could be due to several reasons such as error in payroll processing ,etc.

# SOLUTIONS

- With the platform been deployed on the blockchain a lot of the issues encountered using traditional banking means are eliminated in the following ways
- More transparency with open ledgers on the blockchain
- It is highly impossible for any single point of failure in the system to cause a general failure of the whole blockchain
- Transaction fees are relatively cheaper
- The platform offers both the users and companies the ability to request payment when the set date has been reached preventing payroll withholding.

# WHAT'S NEXT

- In the coming future paytron aims to improve interactivity between employers and their employees by providing a chat or messenger application that would allow for easier communication between the 2 parties. Integration of features that provide e-commerce solutions to handling movement and management of funds.
