

SamhitaDAO

# SamhitāDAO

# Problems in preserving Endangered Languages.

01

Recording and storing  
ancestral stories and  
languages

02

Identifying and obtaining  
authentic materials -  
original  
texts, films, etc.

# How SamhitaDAO solves this problem

---

01

Empowering communities to come together for Language preservation

02

Incentivising member contribution towards developing templates for language preservation

03

Storing various formats of language data for language revival

# What we achieved in Season 4

## Language DAO Creation

- Streamlined process for easy creation of language DAOs
- Users can now deploy their DAO on mainnet and mint tokens

## DAO Governance

Successfully implemented and tested governance contracts

## Template Utilization

- Enabled DAOs to use templates for uniform language datasets
- Templates are minted as NFTs, generating royalties for DAOs

# What's new in Season 5

## User-friendly data platform

Seamlessly upload, edit, and save various data types in one integrated system

## Decentralized Governance

Decentralized governance for evaluating and voting on proposals

## NFT Rewards

Unlocking NFT rewards for Language DAO contributors and creators

## Delegation Enhancements

- Improved delegation process with user-friendly features and advanced analytics for Delegators
- Upgraded checkpoint system for accurate historical voting power tracking

## API Subscription Access

Subscription-based API access to LanguageDAO's language data resources

# Future Goals

1

## Volunteer Program Launch

- Document endangered languages in remote regions
- Global volunteer recruitment

2

## Marketing Boost

- Document endangered languages in remote regions

3

## Partnership Expansion

- Monetize language data through collaborations

4

## Volunteer Program Launch

- Expand NFT rewards program
- Engage with wider NFT community

\*While SamhitaDAO is live on mainnet, support in terms of funds, expertise, and guidance will be pivotal in achieving these milestones.

# Business Model

- **API Subscription Fees**

Offering API access to LanguageDAO's extensive language data resources on a subscription basis.

- **Partnership Monetization**

Collaborating with organizations for the commercial use of our language data. Licensing agreements and revenue-sharing models to tap into wider markets.

- **Grants and Funding**

Applying for grants and funding opportunities in the field of language conservation and technology.

**THANK YOU**

 **SamhitaDAO**
