PROBLEM

New and upcoming artists often struggle to break through the noise and get exposure

Lack of engagement from the music industry on Web3 as the music industry has not fully embraced Web3

A need for a platform where users can invest in future music stars and music albums

SOLUTION

Classic Chords provides a community platform that helps new and struggling artists showcase their music and gain visibility

The platform helps establish a community of artists and fans on Web3, where users can interact with each other in a secure way

Our platform helps fans and NFT collectors to earn more by collecting and trading NFTs on the platform

The NFTs can also serve as tickets for live shows, jam sessions, or concerts.

Classic Chords

WHO CAN USE CLASSIC CHORD

Classic Chords

Emerging artists who want to showcase their music, connect with fans and gain exposure

Music and Art lovers who want to listen to good music, watch live streams, and collect NFTs while supporting their favourite artists

NFT collectors who want to collect and trade tokens that will potentially increase in value over time, earning them a profitable investment

CLASSIC CHORDS IS NOW REVAMPED!

Classic Chords

So what's new?

MIDI sound support

Unleash your inner musician! With the ability to connect MIDI instruments, professionals can now jam out and share their musical creations on this platform.

Multiple instrument support

The platform's diverse range of instruments, in addition to a wide range of sounds was updated to captivate users with instrument preferences and unique musical tastes.

Interactive Stream

Ready to take your streaming experience to the next level? Users can now connect with others through a wide array of interactive features including chats, reactions and the superchat function for a more engaging experience.

Multichain Support

Hold onto your hats! The platform's new multi chain design is taking accessibility to a whole new level. With the support for multiple blockchain networks, users, both experts and beginners alike, now have the freedom to utilise cryptocurrency payments.

A Global Platform for musical requests

Get ready to experience a whole new level of musical connection! Users can simply make a request for their favorite artist's song or put it out there as a global request for anyone to accept.

FUTURE GOALS

1
Collaborating with music artists to generate more exclusive art.

2
Find other options to incentivize the artist in a democratized way.

3
Taking generative art to the next level by working on the backend algorithms creating the art.

OUR TEAM

Classic Chords

Akash

A Blockchain Developer with a deep passion for music. He draws his inspiration and creativity from his love for music, which fuels his ability to write high-quality and efficient codes.

LaBete

A Frontend Developer with keen eyes for details. He knows how to blend style and function in a platform that would not only look appealing to the eyes but would also have all the necessary user-friendly functionalities. He totally nailed it on Classic Chords, despite the project being heavily focused on front-end development.
