

CUKIES WORLD

The first **PLAY-and-EARN** game in  TRON

Available in  BINANCE Chain

CUKIES WORLD IN A FEW WORDS

Cukies World is a Play-and-Earn game where you own a **Cuki**: an **NFT** representing the games main character.

You can explore the **infinite archipelago**, collect resources, build new tools, craft special gems, learn new skills... the possibilities are endless!

Your Cukies can complete daily missions and tasks to earn **GEMD**, the internal **token** of the the ecosystem.

MEET THE CUKIES

1. There are 6 different types of Cukies based on their rarity (common, uncommon, rare, epic, legendary and goat).

2. Cukies health bar will decrease as they play, and you will need to feed them to fill it again.

3. Cukies have 5 different skills (miner, engineer, farmer, gatherer and scout) than can be improved up to level 5. As you improve a skill your Cuki will learn new mechanics and capabilities.

4. Cukies energy is used to accept daily missions and tasks, and they will earn GEMD after completing them. Your Cuki will need to take a rest to recover their energy.

5. Each Cuki can breed up to 5 baby Cukies. You need 2 Cukies to breed.

 The rarer Cukies have more health and energy, allowing them to perform more daily missions and tasks. Also, the rarer the Cuki, the more skill points he will be able to improve.

CONNECTING CRYPTO WORLD AND GAMING INDUSTRY

Cukies World will have an easy to use **in-game scholarship system**, where NFT owners (investors) can lend their Cukies so that gamers can use them to play the game.

Anything the gamer earns will be **shared** between the gamer and the NFT owner based on the %s previously agreed upon.

We will add an option so **guilds** can assign the Cukies they own to their own scholars.

Three ways to play

Single Player

Explore Cukies World at your own pace and discover something new every day!

Cooperative

Join your friends to create a team of Cukies with different skills and aim for glory!

Competitive

Test your skills and show the world who is the bravest Cuki in the Infinite Archipelago!

UKI Token

300,000,000 supply

UKI token is deeply integrated in the Cukies World ecosystem. It's required for breeding, to improve Cukies skills and to craft gems.

40% of the tokens used in-game will go to a **reward pool**. UKI holders can stake their tokens to get these rewards and to vote on key governance decisions and treasury management, ultimately decentralizing the game economy.

GEMD Token

Uncapped supply

GEMD is the main utility token. It's required for breeding, and it will also be used to perform most in-game tasks, such as building cabins, creating or improving tools, crafting new items, and more.

GEMD tokens will be minted as required to pay game rewards. All GEMD used in-game will be **burned**.

ISLANDS

Each **island** will be unique and will have its own business logic. As in the real world, a fertile island, with crops and infrastructure, will not have the same value as a land that has been overexploited.

Island owners will be able to work on their lands to make them more attractive for the Cukies. Island owners will **share a %** of everything made by any Cuki that works in their land.

We will have an island offering for single owners, and others that will be co-owned by many people at the same time. Some islands will be purchased with **UKI**.

UKI TOKEN

Total Supply 300,000,000

(1) Team: 6 months cliff, 24 months daily linear.
 (2) Advisors: 2 months cliff, 24 months daily linear.

(3) Token Sale:

20%	Private Capital round	Price: \$0.05; 2 month cliff, 12 months daily linear.
3.5%	Private Sale	Price \$0.068; 15% TGE, 6 months daily linear.
3.5%	IDO	Price \$0.068; 15% TGE, 9 months daily linear.

Listing Price: \$0.08
Marketcap at listing: <\$1,000,000
FDV: \$24,000,000
