

Trustree

Trustree connects businesses with
verified tree planting projects to restore
our planet

About

Trustree is a scalable open platform that allows forest projects of any size, from around world, to measure, report, verify and fund their projects with digital transparency.

The main goal of the **Trustree** platform is to give people involved in forest planting projects the opportunity to attract funding from all over the world, and potential investors to gain confidence in the project through decentralization and triple verification.

Verification

First. One of the independent validators checks the correctness of the information provided and writes a small review of the project

Second. the validator needs to travel to the project location and, in addition to the review, also provides photo and video files

Third. Trustree team collects and finalizes all the data and makes a decision on project verification

Target users

1

Project operators

Access digital MRV tools and financing needed to protect and scale your forest projects.

2

Validators

Ensure forests are thriving by leveraging blockchain technology and collective expertise.

3

Funding partners

Directly support Trustree development and forest projects all around the world.

Key features

Accessibility

We make sure all forestation projects around the world, both big and small, have access to our digital platform.

Transparency

By recording all data and transactions on the blockchain, we achieve a level of transparency never before seen in the forestation industry.

Scale

Trustree fully decentralized, meaning new solutions to address climate change can be built quickly using Trustree as the foundation.

Financing

Transparent, truthful and eligible forestation projects can get access to carbon financing when the MRV process is successful.

Forest Restoration Platform

Measure, report, verify and fund forestation projects with digital transparency.

Trustree platform is currently in Beta. Please select Nile Testnet in your Tronlink wallet.

Project Name	Project ID	Amount (TRX)	Trees
Malaysia Project #1	#1	15000 TRX	100 trees
Vietnam Project #1	#2	15000 TRX	100 trees
Vietnam Project #2	#3	30000 TRX	200 trees
Vietnam Project #3	#4	15000 TRX	100 trees
Malaysia Project #2	#5	150000 TRX	1000 trees
Malaysia Project #3	#6	22500 TRX	150 trees
Thailand Project #1	#7	34500 TRX	230 trees
Thailand Project #2	#8	16500 TRX	110 trees

Create new project

Name
What is the name of your project. You can use the name of the location where the project is located

Thailand Project #3

Funding price
Price in TRX tokens, which will be enough to fund the entire project

120000

Country
Country where the project is located

Thailand

Location
Provide data on the longitude and latitude of a point in the center of the forest project
For example: 3.020569, 101.644622

3.020569, 101.644622

Number of trees
The number of trees that will be grown under this project

800

Number of CO2
How many tons of CO2 are sequestered per year

96

Species
All types of trees that grow on the project location. List separated by commas

Project page, with status, all info and verification fields

Number of trees	110
Number of CO2	13
Species	Chiang Rai, Phrae, Mukdahan
Year	2023

Verification page

Trustree

×

First verification

Project verification is necessary so that potential investors are confident in the reliability of all information on projects.

All verification data is stored on the Tron blockchain and IPFS and therefore permanent and decentralized.

During the first verification, you need to evaluate the correctness of all data and write a small review of the project. At the time of project funding, the first verification validator receives 20% of the total pool of issued Trustree (TRT) tokens for a specific project.

Verify

Deny

Smart contracts

- **Main NFT contract** (TRC-1155). Creation of an NFT project, 3 stages of verification, project funding
- **Trustree token contract** ('TRT', TRC-20). The project token is used to provide financing to the validators and creators of the project

Thank you for your attention!
