

SamhitaDAO

SamhitāDAO

Samhitā

literally means

"a methodical, rule-based combination of text or verses".

Problems in preserving Endangered Languages.

01

Recording and storing
ancestral stories and
languages

02

Identifying and obtaining
authentic materials -
original
texts, films, etc.

How SamhitaDAO solves this problem

01

Empowering communities to come together for Language preservation

02

Incentivising member contribution towards developing templates for language preservation

03

Storing various formats of language data for language revival

Why we're at the right place at the right time!

According to UNESCO, 1 language dies every 14 days.

Disappearance of indigenous languages at an alarming rate – caused by urbanization and the growing globalization.

More than 43% of world languages are endangered.

Demo

Future Goals

1

In the near future, we aim to improve our data structure and make sure our language data storage methods are all standardised.

2

We have plans to onboard volunteers who are not necessarily speakers of these languages but share a passion for their conservation. They will travel to remote regions to record audios, videos, scan texts, and assist in the digitization of these endangered languages with a reward system in place to incentivize them.

3

We also plan on partnering with other organisations to monetize the language data we store, thus providing more incentives for our DAO members.

Our Team

Aaroahi

A talented blockchain developer who believes that language is a vital part of cultural identity. She always wants to ensure that it is protected and passed down to future generations and is always on the lookout for new ways to merge her two passions — technology and language.

Adithya

A skilled frontend developer. With a keen eye for detail, he ensures that the platform's user experience is seamless and user-friendly. He believes that a well-designed frontend is key to the success of any application and takes pride in delivering high-quality work that meets the needs of Samhita DAO's users.
