

# CUKIES WORLD

# The Infinite Archipelago

Cukies Metaverse is a thriving ecosystem around the beloved Cukies.

These adorable creatures, who call the infinite archipelago their home, were released as NFTs in late 2021.

## Cukies World

Cukies World is the core of the ecosystem.

It's an MMORPG that lets players use their Cukies to explore islands, craft items, build tools, and use the resources they gather from nature to create their dream home.

# Significant Updates

We've made significant progress since participating in the last Hackathon. We will go over it in the next slides.

## Game Version 1.0.6

Since releasing the beta version for Windows and Android in January 2023, we've added new features, items, and crafting and building options.

We have also improved many things such as lighting, shadows, animations, and ambient effects, and incorporated community feedback to enhance the game's UX.

**Build Your House  
and keep improving it**

**Create and craft dozens  
of useful items**

X to open market

E to interact

**Upgrade your island  
with ramps and bridges  
to reach new areas**

## Social Island

The Infinite Archipelago has many secret areas still to be discovered, but the first one will see the light soon.

The first social island where Cukies (and players) can interact, collaborate, and share their experiences has been discovered and it will have new visitants shortly, creating a whole new opportunity of things to do.

## A Whole Metaverse

In addition to Cukies World, we're working on several mini-games that will soon be released and will allow Cukies NFTs to be used in new and exciting ways.

Cukies: Rush & Run is one such game, and we have two others in the pipeline.

**Cukies World**

**Dungeon**  
Coming soon

**Platform game**  
Coming soon

**Cukies Rush n' Run**

## Fully Improved Game Economy

Players rewards will come mainly through the advertising revenue made by the company across all our games, making a self-sustainable economy.

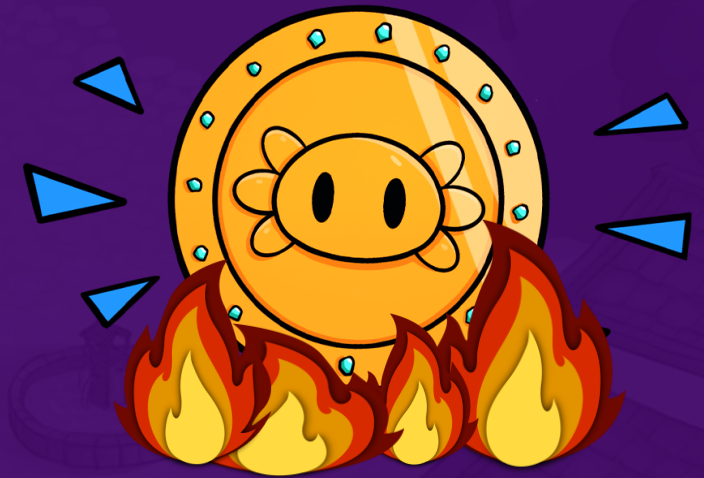

Cukies World is the core of the ecosystem and it will be connected to all the upcoming minigames, creating a cross-economy that will benefit our token and NFT holders.

## A Deflationary Model For Our Upcoming Token UKI

We'll use a percentage of the income generated by each game to buy back tokens from the market and burn them, making the UKI token deflationary.

# ROADMAP

START

**Improve the user experience**

**Introduce resources scarcity**

**Introduce cooking system**

**Launch the social island**

GOAL

**Launch on the Play Store**

**Add music and sound effects**

**Add health and energy bars for Cukies**

**Add lore and skill missions**

**Add chat system to the social island**

# CUKIES WORLD
